

Cheat codes

On desktop, press Enter to open chat, type one code and press Enter again. On touch controls, open Chat, enter the code and tap Send. Codes ignore capitalization and spaces at the beginning or end; enter the full code as one message. In Multiplayer, only the host can use cheats. Codes and cheat results are private and never appear in hero speech bubbles.

New and changed codes

Code	Effect
lel	Add 10 unspent skill points. Replaces lol, which is now ordinary chat.
qwe	Add 30 unspent skill points.
asd	Add 30 unspent stat points.
qqq	Raise your class rank by one, up to SSS. The rank is saved with your hero; automatic promotions resume on your next level.
www	Lower your class rank by one, down to Unranked. Automatic promotions resume on your next level.
zzz	Add 5 random, named Legendary equipment pieces crafted for your class, with faction licenses and special powers like Lape's offers. Requires space for all five; normal equipment requirements apply.
orb	Add 5 Bloodrift Orbitals and 5 random Orbitals (any family, repeats possible). Requires space for the whole gift.

Codes can be repeated. Rewards and point changes are kept by the normal save system. Item gifts add nothing if the entire gift will not fit. Skill, stat and talent points are separate pools.

Distribute stat points

Open Character. Each attribute has an All button to assign every remaining point to that attribute. Hold + to keep adding points; release or move away to stop. Existing choices for other attributes are preserved. Select Apply Points to spend the points, or Clear to discard the pending choices.

Party chat

Press Enter or tap Chat to write a message. Multiplayer keeps a scrollable party chat log at the side; messages also appear above heroes for 3 seconds. Type @ and a player name, then press Right, Space or Enter to complete the suggested name (or tap a suggestion). Press Enter again to send. Names containing spaces are completed as @"Player Name". Use @everyone to ping the whole party. Mentioned players hear an alert and see the sender's message flash. Use the Emoji button to insert an emoji. Both devices need this game version.
