

The Fifteen Boss Collections

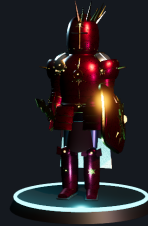

Every collection drops only from actual bosses of level 30 or higher (dungeon lords, their Usurpers and the named Depth Guardians): one piece per victory, weighted toward the sets you have started and the pieces you are missing. All pieces are Master rarity and require level 30 and 32 of the class's principal attribute.

Guaranteed set bonuses

Bonuses build up as you wear more distinct pieces of one collection. Duplicate copies of a piece never count twice; removing a piece updates the bonuses at once. Individual pieces also roll their normal Master affixes, and every piece can hold sockets and crystals.

3 pieces

By the collection's class: Knight +10% Defense and +8% maximum health; Ranger +12% projectile damage and +25 Accuracy; Mage +10% maximum Mana and +8% cast speed; Shadowblade +8% attack speed and +12% Evasion.

6 pieces

+12% damage and +6% resistance for the collection's element.

Full collection

The collection's own effect (13 pieces with a shield, 12 for two-handed collections): listed on each page.

Collection odds

Random set selection favours your class (2x) and any collection you own but have not finished (4x); within the set, each missing piece is 6x as likely as one you already own. Every set stays possible for every hero; duplicates can still happen. Ownership counts your bag, worn gear, bound Tempos, the Spirit Hall, pending recovery and the Hero's Vault.
